Total Power: 740

### Tanks

Fuel: 265

Fresh Water: 103

Holding: 18

### Description

Every now and then a work of art or piece of design comes along that is more than an evolution of what came before a quantum leap in thinking and execution. The Riviera M3600 Sport Yacht is such a leap. The vision for this new style of boat was, however, inspired by decades of experience in markets as diverse as Australia, Europe and the USA. Riviera realized that there was a need for a boat that was both solid and dignified, in the tradition of our Flybridge Convertibles, yet spirited and contemporary in the same vein as our Sport Cruisers.

The result might best be

described as a serious motor yacht with a refreshingly light and sporty side. Starting with a blank canvas gave us the opportunity to address the needs of today's boat owner like never before. Drawing on contemporary architecture, European car design, fashion, leading furniture design and other sources, we have created a boat of impeccable style and one that is utterly modern.

Everything about the Sport Yacht is designed to make life on the water easy, relaxed and fun. To dream of such a boat is one thing, to create it is another. However, no one is better equipped to realize such a vision than Australia's most awarded pleasure boat builder, Riviera, a company with over 27 years boat building experience and owners of the largest pleasure boat building facility in the Southern Hemisphere.

#### Overview

One of the most striking features of this, Riviera's first in a growing range of Sport Yachts, is the huge rear window and door between the cockpit and saloon. Not only is it extremely stylish with tinted glass set in a bold, highly polished stainless

steel frame, it opens up to create the ultimate indoor-outdoor feeling. The two areas just flow into one to produce a unique al fresco experience.

The fact that the galley is on the same level as the cockpit and saloon also means that the chef remains in the middle of the party. The galley is just a step away from the cockpit and for entertaining there is a second refrigerator here.

At every turn you will find Riviera ingenuity – like the cockpit table that folds open from coffee table size to an extended dining table, the way the stainless steel swim ladder folds away, and the discreetly placed drink holders on the foredeck sun pad. As for comfort, the large L-shaped lounge with its soft leather and deep cushions is probably more inviting than the couch in your living room.

Yes, easy living and an idyllic environment to share leisure time with your family and friends. But this is a boat of real substance too, one that boasts the most sophisticated design and construction methods. Including a hand-laid solid fiberglass hull with

separate compartments  
and a watertight collision  
bulkhead forward.

The 3600SY also features  
an innovative, highly  
efficient hull with  
"tunnels"™ that  
house the propeller shafts  
and an underwater  
exhaust system. The result  
is a quieter boat that is  
both more responsive and  
fuel-efficient.

This may be a new style  
of motor yacht but the  
quality and superior  
technology tells you that  
it is every inch a Riviera.  
Style or good taste may  
be hard to define but you  
instantly recognize it  
when you see it and  
you will see it here in  
abundance. It's in  
everything from the subtle  
color contrasts of the  
vinyl covered headliner to  
the use of a light cherry  
timber with a satin finish.  
Even details such as the  
fabric concealing the  
speakers and the silver  
trim of the cabinetry has  
been carefully considered  
and beautifully executed.  
Of course, style goes  
beyond looks in that it is  
functional as well as  
fashionable – the  
practicality of the Amtico  
flooring is an example  
here. And style has a feel  
to it: the solid feeling you  
get when you step aboard,  
the diameter of the hand

rails, the molding of the transom, the extensive use of gas struts on all cockpit hatches that makes for easier, safer operation.

The sense of light and space aboard the 3600SY is extraordinary (In fact the 3600SY is over 38 feet in overall length).

The panoramic windows, uncluttered layout and the use of lighter timbers and innovative materials all contribute to an interior that's just perfect for relaxed, fun-filled days and laid-back, indulgent nights.

All your creature comforts are catered for including a quality onboard entertainment system featuring a CD/DVD player and a 22-inch LCD television that rises and returns to its housing, out of sight, at the touch of a button.

The feeling of being in control as you sit at the helm is magnificent. For a start, you have such clear, sweeping views " and the molded dash, reminiscent of a luxury European car, displays all instruments and controls in the most ergonomic fashion. Even a novice will find this a remarkably easy vessel to handle.

Accommodation consists of a master stateroom with a large island bed, 6'

7" feet headroom, and generous cupboard and hanging space. The twin-bed guest cabin is also extremely well appointed and luxuriously comfortable. Even the bathroom echoes the same interior style and finesse with its solid surface sink, vanity, quality fittings and a shower stall with glass partition.

If ever there was a craft that epitomizes Riviera's pursuit of quality and represents our sheer creativity, this is it. If you are looking for an entirely new boating experience, we welcome you aboard the Sport Yacht.

Accommodations  
• Two Cabins- Accommodation below consists of a master stateroom with island bed, 6' 7" headroom, and generous cupboard and hanging space. The twin-bed guest cabin is also luxuriously comfortable, while the bathroom echoes the same sentiments.

• Expansive Saloon- It's all here "helm, lounge and galley. Specification is high. The soft leather L-shaped lounge is inviting. The feeling of being in control at the helm is compelling. The molded

dash is akin to a luxury European car.

â€¢ Central Galley- On the same level as the cockpit and saloon, and cool thanks to air-conditioning in the saloon, you'll cook up a feast with features such as microwave oven, cooktop, fridge/freezer, sink with faucet, and significant bench.

â€¢ Indoor-Outdoor- The huge rear window and door between cockpit and saloon, are a revelation. Stylish, in tinted glass and polished S/S frame, the opening creates the ultimate indoor-outdoor feel. The two areas just flow into one.

â€¢ Sun Special- For sun-worshippers, there is a sun-pad on the foredeck. But most will gravitate to the ambience of the cockpit where a folding table, lounge, refrigerator and huge boarding platform, add a new dimension.

â€¢ Robust Construction- The hand-laid solid fiberglass hull has separate compartments and a watertight collision bulkhead forward. Hull â€˜tunnelsâ€™™ house the prop shafts and underwater exhaust system.

â€¢ Contrasting Décor- Impressive are

the subtle color contrasts of the headliner and light beech timber. Details such as the fabric concealing the speakers and the silver trim of the cabinetry, certainly catch the eye.

â€¢ Innovation

Personified-Practical features like Amtico flooring, hand-rail diameter, transom moldings, gas struts on hatches, panoramic windows, CD/DVD player and a 22" LCD TV, offer insight into Rivieraâ€™s commitment to luxury.
