Deck and Superstructure

Laminated in sandwich construction with balsa core. Obtaining high resistance and lower weight. All parts which belong to the structure are connected with stainless steel bolts of 316 types. The Hull of the MOTOR YACHT TANGO 60 is constructed entirely of laminated fiberglass in a solid, one piece mold with cedar, plywood, and polyurethane foam reinforcements. Critical zones as chines, transom, engine room's bottom, shafting line, are reinforced to avoid vibration and high stresses from engines.

Electrical

All equipment are of American makers and suitable for naval building. Cables can be wicked at temperature rates of 105 degrees centigrade and cross sections are designed for continuous load with safety margin.
